Dr. Michael Franz Basch, Distinguished Professor of Psychiatry at Rush-Presbyterian-St. Luke's Medical Center in Chicago, where he held The Cynthia Oudejans Harris Chair, died at the age of sixty-seven on January 24, 1996. At the time of his death, Basch was at the zenith of his professional career. After having made major and original contributions to psychoanalysis in the areas of affect development, perception, and consciousness, he turned his attention to the complex problems related to the relationship between the neurosciences and psychoanalysis. This, however, was not the extent of his scientific contributions. He also had authored four books on psychotherapy: Doing Psychotherapy, Understanding Psychotherapy, Practicing Psychotherapy, and his last book, Doing Brief Psychotherapy, which was published shortly before his death.

Born in Berlin, Basch came to this country at the age of ten. He graduated from Loyola University's School of Medicine and served in the United States Navy and Marines in Korea and Japan. His psychiatric residency was at Michael Reese Hospital, and he was a graduate of the Institute for Psychoanalysis in Chicago. At the time of his death, he was a training and supervising analyst at that institution.

Michael Basch was a highly esteemed teacher; he lectured extensively in this country as well as abroad and had a significant influence on the next generation of psychoanalysts and psychotherapists. He is survived by his wife Carol, a psychologist, and his three children, all of whom are pursuing careers in medicine.

Anna Ornstein, M.D.
In Appreciation of Our Reviewers

This issue of the Journal of Psychotherapy Practice and Research marks the completion of our fifth year of publication. We again take this opportunity to recognize the outstanding contributions of our reviewers and Editorial Board. We note with sadness the death of Michael Basch this year.

The reputation that the Journal has achieved in no small way reflects the impressive quality of the efforts of our reviewers. Each submission that is reviewed is critiqued by at least three reviewers. We continue to receive expressions of gratitude from authors about the thoroughness and helpfulness of our review process.

To date, the Journal has received a total of more than 323 manuscripts, of which 80% were sent for outside review (20% were rejected or withdrawn without peer review). Of the 323 submissions, 149 were accepted, a minimum overall acceptance rate of 46% (a minimum since some are still under consideration), and 161 were rejected, a minimum rejection rate of roughly 50%. Once again, we believe, these are admirable figures for such a new journal and reaffirm our belief in the vitality of the psychotherapy field.

We would be remiss if we did not acknowledge the continuing support of the staff at the American Psychiatric Press, Inc. In particular, we wish to single out our Managing and Assistant Editors, John McDuffie and Roxanne Rhodes, as well as our Editorial Assistant, Christina Green. For her continuing enthusiasm and wisdom, we also thank Dr. Carol Nadelson, President and Chief Executive Officer of the Press, who has guided us through the first five years of publication.

Lastly, we thank our contributors and readers. We welcome your thoughts and ideas on how to improve the Journal and remain committed to assisting authors in publishing their clinical reports.

Peer Review: All manuscripts, including those written at the invitation of the editors, are subject to blind peer review to determine the originality, validity, and significance of the submitted material. Reviewers of manuscripts will be blind to the authors' identity and authors will be sent reviewer comments that are judged to be useful to them.

Manuscript Specifications: Manuscripts must be typed double-spaced with one-inch margins on plain bond paper. Draft-quality dot matrix printouts will be returned unreviewed. The cover page must contain the article title, authors' names and affiliations, and address for correspondence and telephone number of corresponding author. Anything identifying the author or the institution where the work was done should be removed from the remainder of the manuscript in order to protect the “blind.” Each article must include an abstract (100-word maximum), keywords for indexing, and a reference list. References are numbered and listed by their order of appearance in text; text citation is followed by the appropriate reference number in parentheses. Do not arrange the reference list alphabetically. Authors should be sure that all references listed have been cited in the text. Personal communications, unpublished manuscripts, manuscripts submitted but not yet accepted, and similar unpublished items should not appear in the references list. Such citations may be noted in the text. List only the first three authors in the reference list and designate one or more authors past the third as “et al.” Journal names should be abbreviated as they appear in Index Medicus; journals not currently indexed there should not be abbreviated. For the Journal’s four-page unabridged Information for Contributors, write Christina Green at the Journal address or call 202-682-6336.

Submission Procedure: The original manuscript and four copies should be submitted to Jerald Kay, M.D., Editor, The Journal of Psychotherapy Practice and Research, 1400 K Street, NW, Washington, DC 20005. Submissions should be accompanied by a cover letter indicating that the paper is intended for publication and specifying for which section of the journal it is being submitted (Special or Regular Articles, Grand Rounds, Classic Articles with Commentary, Book Reviews, or Letters to the Editor). Books to be considered for review should be sent to Walter N. Stone, M.D., Book Review Editor, The Journal of Psychotherapy Practice and Research, 1400 K Street, NW, Washington, DC 20005. Anyone wishing to review books for the Journal should apply to Dr. Stone at the same address.
