APPRECIATION

In Appreciation of Our Reviewers

This issue of the Journal of Psychotherapy Practice and Research marks the completion of our first year of publication. We would like therefore to recognize the outstanding contributions of our reviewers and Editorial Board members, who have assisted greatly in launching this new journal.

The Editorial Board members reviewed many of the articles that appeared in the first year of publication. The quality of any scientific journal is ultimately dependent on the manuscripts it receives; however, in part, what has permitted us to publish such excellent articles has been the rigorous examination of each manuscript by our reviewers. Many articles published this past year received four reviews, and virtually all were reviewed by three experts. Numerous contributors wrote to us thanking us for the very thorough and helpful comments provided by our reviewers.

To date, the Journal has received a total of 116 submissions, of which 89% were sent for outside review (11% were rejected or withdrawn without outside peer review). Of the total 116 manuscripts submitted, 38 were accepted, a minimum overall acceptance rate of 33% (minimum since some are still under consideration), and 59 were rejected, a minimum overall rejection rate of roughly 51%.

These, we believe, are admirable figures for a new journal and support our sense of the vitality of the psychotherapy field.

We also thank the staff at the American Psychiatric Press, Inc., for their exceptional support. In particular, we recognize Dr. Carol Nadelson, Editor-in-Chief, who correctly foresaw the need for a journal of this type.

Finally, we thank our contributors and readers. You have invested your time and energy in supporting the study of psychotherapy.

Jerald Kay, M.D., Editor
Allan Tasman, M.D., Deputy Editor

Does psychotherapy research really offer good ideas for psychotherapists? (commentary). Luborsky L. Fall 310–312

Producers and consumers of psychotherapy research ideas (commentary). Stiles WB. Fall 305–306

Psychotherapy research: consumers, the consommé, and the consumed (commentary). Yager J. Fall 307–308

Psychotherapy treatments for depression in children and adolescents. Holmes WD, Wagner KD. Fall 313–323

Review of “Producers and consumers of psychotherapy research ideas” (commentary). Cooper A. Fall 309–310

Psychotherapy, Theory
Control processes and defense mechanisms. Horowitz M, Cooper S, Fridhandler B, Perry JC, Bond M, Vaillant G. Fall 324–356

The curative fantasy and psychic recovery: contribution to the theory of psychoanalytic psychotherapy. Ornstein A. Winter 16–28

Psychotherapy, Training
Training psychotherapists in hierarchical treatment planning. Makover RB. Fall 337–350

Repetition Compulsion
The revictimization of adult women with histories of childhood abuse. Chu JA. Summer 259–269

Schizophrenia
On the origin of the “influencing machine” in schizophrenia (classic article). Tausk V. Spring 184–206

Schizophrenic patients’ attitudes to therapists using behavioral and holistic-humanistic techniques (clinical and research report). Stark FM, Liberman RP, Corrigan PW. Winter 80–85

Self Psychology
The curative fantasy and psychic recovery: contribution to the theory of psychoanalytic psychotherapy. Ornstein A. Winter 16–28

Psychophysiological experience fulfilling a selfobject function (clinical and research report). Martin JP. Spring 160–162

Self-Defeating Personality Disorder
The curative fantasy and psychic recovery: contribution to the theory of psychoanalytic psychotherapy. Ornstein A. Winter 16–28

Sleep
The applied use of psychotherapy in the study of the psychobiology of depression (clinical and research report). Thase ME, Simons AD. Winter 72–80

Substance Abuse
The use of brief psychotherapy with substance abusers in early recovery (clinical and research report). McDuff DR, Solounias BL. Spring 163–170

Therapeutic Alliance
The therapeutic alliance in managed care mental health practice. Sabin JE. Winter 29–36

The therapeutic rollercoaster: dilemmas in the treatment of childhood abuse survivors. Chu JA. Fall 351–370

Treatment Planning and Selection
Training psychotherapists in hierarchical treatment planning. Makover RB. Fall 337–350

Women’s Treatment Issues

The revictimization of adult women with histories of childhood abuse. Chu JA. Summer 259–269

The therapeutic rollercoaster: dilemmas in the treatment of childhood abuse survivors. Chu JA. Fall 351–370

**INFORMATION FOR CONTRIBUTORS**

The *Journal of Psychotherapy Practice and Research* is a peer-reviewed interdisciplinary journal published quarterly by the American Psychiatric Press, Inc. Its aim is to advance the professional understanding of human behavior and to enhance the psychotherapeutic treatment of mental disorders. The Journal publishes review articles; original clinical, research, and educational articles; book reviews; and letters. The editors welcome contributions of original manuscripts that are not under consideration elsewhere. Upon acceptance of an article, the author(s) will be required to assign copyright ownership in writing to the American Psychiatric Press, Inc.

**Peer Review:** All manuscripts, including those written at the invitation of the editors, are subject to blind peer review to determine the originality, validity, and significance of the submitted material. Reviewers of manuscripts will be blind to the authors’ identity and authors will be sent reviewer comments that are judged to be useful to them.

**Manuscript Specifications:** Manuscripts must be typed double-spaced with one-inch margins on plain bond paper. Draft-quality dot matrix printouts will be returned unreviewed. The cover page must contain the article title, authors’ names and affiliations, and address for correspondence and telephone number of corresponding author. Anything identifying the author or the institution where the work was done should be removed from the remainder of the manuscript in order to protect the "blind." Articles submitted on disk are encouraged, but must be accompanied by the original and four hard copies. Each article must include an abstract (100-word maximum), keywords for indexing, and a reference list. References are numbered and listed by their order of appearance in text; text citation is followed by the appropriate reference number in parentheses. **Do not arrange the reference list alphabetically.** Authors should be sure that all references listed have been cited in the text. Personal communications, unpublished manuscripts, manuscripts submitted but not yet accepted, and similar unpublished items should not appear in the references list. Such citations may be noted in the text. List only the first three authors in the reference list and designate one or more authors past the third as "et al." Journal names should be abbreviated as they appear in *Index Medicus*; journals not currently indexed there should not be abbreviated. For the Journal's four-page unabridged *Information for Contributors*, write Anne Friedman at the Journal address or call 202-682-6336.

**Submission Procedure:** The original manuscript and four copies should be submitted to Jerald Kay, M.D., Editor, *The Journal of Psychotherapy Practice and Research*, 1400 K Street, NW, Washington, DC 20005. Submissions should be accompanied by a cover letter indicating that the paper is intended for publication and specifying for which section of the journal it is being submitted (Special or Regular Articles, Classic Articles with Commentary, Book Reviews, or Letters to the Editor). Books to be considered for review should be sent to Walter N. Stone, M.D., Book Review Editor, *The Journal of Psychotherapy Practice and Research*, 1400 K Street, NW, Washington, DC 20005. Anyone wishing to review books for the Journal should apply to Dr. Stone at the same address.
